PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 1.5+ years of experience building enterprise applications at IBM using Python, Java, REST APIs, SQL, cloud platforms, and DevOps practices. Experienced in developing backend services, event-driven systems, automation frameworks, and GenAI-powered solutions. Strong foundation in API development, database management, CI/CD, cloud deployment, and collaborative Agile development with a passion for building scalable AI-driven applications.

TECHNICAL SKILLS

Languages: Python, Java, SQL, Go, TypeScript, JavaScript, C++
AI / GenAI: LLM Applications, Retrieval-Augmented Generation (RAG), APIs, Pandas, NLP
Backend: FastAPI, Spring Boot, REST APIs, JWT, WebSockets, Kafka, IBM MQ, Node.js
Frontend: Angular, React.js, Next.js, Tailwind, HTML5, CSS3/SCSS
Databases: PostgreSQL, MySQL, MongoDB, Firestore, Cloud SQL
Cloud & DevOps: AWS, Google Cloud Platform(GCP), Docker, Kubernetes, Firebase, Git, GitHub Actions, Jenkins, CI/CD
Practices: Microservices, API Design, Agile/Scrum, Distributed Systems, Testing & Automation

PROFESSIONAL EXPERIENCE

- Software Developer | IBM India Pvt Ltd** July 2025 – July 2026
 - Designed and developed secure REST APIs using Java/Spring Boot with JWT authentication and RBAC, improving production stability by 45% while collaborating across backend, QA, and DevOps teams.
 - Built event-driven backend services using Kafka and IBM MQ integrated with SQL-backed enterprise workflows, reducing asynchronous processing backlog by 35% and MTTR by 40%.
 - Designed GenAI-powered workflow automation solutions by integrating LLM-based reasoning capabilities into 3+ enterprise workflows, collaborating with product, QA, and DevOps teams to deliver AI-driven process improvements.
- Software Developer Intern | IBM India Pvt Ltd** Jan 2025 – June 2025
 - Developed Python automation frameworks for enterprise testing, reducing regression effort by 30% through API validation, log analysis, and automated workflow testing across multiple development environments.
 - Accelerated onboarding for 3+ engineers by 40% by authoring system-level documentation and contributing to 5 production code reviews, upholding security-first SDLC standards and promoting knowledge-sharing across the team.
- Web Developer Intern | Athvie Global** Jan 2024 – April 2024
 - Delivered a fully responsive client website end-to-end in 3 months, cutting design revision rounds by 50% by leading UX-driven Figma prototyping before a single line of code was written, then validating the launch across 3 device breakpoints.

EDUCATION

B.Tech, Computer Science & Engineering | PES University, Bengaluru 2021 – 2025
CGPA: 8.5/10 | GATE 2024 (DA): 358 | Specialisation: Machine Intelligence & Data Science
Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Software Engineering, Cloud Computing, OOP

KEY PROJECTS

- AI-Powered Workflow Management Platform (Jira++)** — *Spring Boot, Angular, WebSockets, MySQL, GCP, JWT, Python*
 - Engineered a multi-user real-time kanban system with WebSocket (STOMP) live sync, JWT auth, role-based access control, and Spring Security, achieving 60% faster deployments via automated GCP CI/CD pipelines and demonstrating full-stack development, microservices fluency, and security-first design end-to-end. Integrated AI-powered task recommendations using Python-based services to improve workflow efficiency.
- CloudOps Monitoring Dashboard** — *React.js, TypeScript, FastAPI REST APIs, PostgreSQL, Docker*
 - Built a cloud-native infrastructure monitoring dashboard with real-time telemetry and service health metrics combining a React/TypeScript frontend with a FastAPI backend deployed in Docker containers, applying distributed computing and DevOps best practices.
- LLM-Powered Review Intelligence Platform** — *Python, Pandas, VADER, RoBERTa, Hugging Face Transformers, PyTorch, Scikit-learn*
 - Built a sentiment analysis pipeline using Python, Pandas, VADER, and RoBERTa to analyze 10,000+ customer reviews. Generated AI-driven insights using transformer-based NLP models. Automated preprocessing and visualization for large-scale datasets.

RESEARCH & ACHIEVEMENTS

- IEEE Xplore Publication — "Real-Time Thought-Driven Scene Creation (fMRI approach)" — showcasing large-scale systems thinking and advanced technical research capability.
- Top 5 of 90 teams — HealthSpark Ideathon (IEEE-RAS): national-level health-tech innovation challenge.
- GSSOC 2022 Top 50 Global Contributor — ranked in top 50 out of thousands of open-source contributors across 10+ projects, reflecting strong open-source collaboration experience.
- Google Developer Students Club (PESU-ECC) — conducted Web Development & UI/UX workshops; mentored junior engineers on front-end engineering and project delivery.
